

As President of Moderna, Dr. Stephen Hoge leads drug discovery, preclinical development, and platform R&D, including chemistry, biology, formulation, and early stage technical development. Dr. Hoge joined Moderna in 2012, and as a leader from the earliest days of the company has had a wide range of responsibilities. These include heading corporate development and corporate strategy, and also founding Moderna's therapeutic area ventures in oncology, infectious disease, and rare diseases.

Prior to Moderna, Dr. Hoge was a partner at McKinsey & Company and a leader in the firm's healthcare practice. Prior to joining McKinsey, Dr. Hoge was a physician in New York. He holds an M.D. with thesis from the University of California, San Francisco and a B.S. in neuroscience from Amherst College.
